

## *Water Conditioners*

Aerus Whole House Water Conditioners are designed to help reduce water contaminants, scale buildup, and electricity use. Our water conditioners also help extend the life of your appliances, deliver better-tasting water, and make cleaning easier—from sparkling dishes to softer laundry and more.

# D'PURE

Water Conditioners do more than “fix” hard water. They make your home healthier by reducing water contaminants that end up in your drinking water, improve the lifespan of your appliances, and even make cleaning easier. Aerus Water Conditioners combine the latest in water conditioning technology with industry expert knowledge to give you a powerful and reliable Water Conditioner.

# WC 400

The Origins WC400 is a residential water conditioner that treats the presence of “hard water” in homes.

It improves the lifespan of plumbing, appliances, and even laundry while also improving the taste of your drinking water.

Features and Benefits:

- Fully ported electronic valve affords fully automated, metered functionality
- Accommodates any type of plumbing
- Robust ion exchange resin for years of service-free operation
- An innovative ceramic core control valve design for smooth, dependable operation
- Softened, iron free water from every faucet in your home
- Eliminates particulate such as sand, rust, and other sediment
- Metered demand controls to reduce operating costs
- Better tasting water, coffee, tea, and other beverages made from tap water
- Significant reduction of soap and cleaning products cost

# WC 300

The Origins WC300 is a residential water conditioner that removes the presence of “hard water” directly at the source. It provides better tasting water to your home while also improving the lifespan of your plumbing, appliances, and even clothing washed in your home.

## Features and Benefits:

- Fully ported electronic valve affords fully automated, metered functionality
- Accommodates any type of plumbing
- Robust ion exchange resin for years of service-free operation
- An innovative ceramic core control valve design for smooth, dependable operation
- Softened, iron free water from every faucet in your home
- Eliminates particulate such as sand, rust, and other sediment
- Metered demand controls to reduce operating costs
- Better tasting water, coffee, tea, and other beverages made from tap water

# WC 200

The WC200 is a residential water conditioner that takes your “hard water” and turns it into conditioned water that improves the lifespan of your appliances, plumbing, and even laundry. It also improves the taste of your water so you can stay hydrated without the poor taste. It features 2.0 cubic feet of resin volume and a metered control valve to maximize efficiency.

## Features and Benefits:

- Fully ported electronic valve affords fully automated, metered functionality
- Accommodates any type of plumbing
- Robust ion exchange resin for years of service-free operation
- An innovative ceramic core control valve design for smooth, dependable operation
- Softened, iron free water from every faucet in your home
