

D'PURE

## *Ultraviolet Disinfection*

Peace of mind. . . that's what the Origins UV filter line of products supply. Built to the most exacting standards, all of the ultraviolet models offered by Aerus are designed to perform in the most demanding applications. Trusted by millions of homes, disinfection with UV technology is not only user friendly, but recognized as one of the most effective means by North American Health authorities.

## FEATURES

- High performance UV lamp, rigorously tested to provide consistent output over the entire lamp life
- High UV output lamp technology provides great performance in a smaller footprint
- Robust power supply featuring a countdown timer with digital display, and audible lamp change reminder for ease of maintenance
- Assured peace of mind with NSF 55 Class B certification

## BENEFITS

- Affords protection from potential issues you may not be aware of, as 1 in 3 wells are contaminated with bacteria
- As a chemical-free process, there are no byproducts in the water, or disinfectant levels to monitor
- Once exposed to the UV light, organisms such as bacteria, viruses, and protozoa are sterilized
- Maintenance comes down to changing the light bulb once a year
