

D'PURE

Laundry Pro 2.0

Innovative Technology for Really Clean Laundry
The ActivePure Technology built into each Laundry Pro 2.0 is based on a variation of the technology originally developed for use on the International Space Station and is recognized as exclusive Certified Space Technology by the Space Foundation.

The Laundry Pro combines the power of ActivePure Technology and oxygen-based oxidizers to clean your laundry without the use of detergent. It's an effective cold-water system designed for residential use.

Features and Benefits:

- No need for detergent – Oxygen, peroxides, and other gases bubble into clothing to lift away dirt and odors – Makes clothes softer – Build-up on towels, linens, and your clothes can weigh them down; over time, Laundry Pro lifts old detergents out of fibers, restoring their natural softness
- No maintenance – Laundry Pro requires no cleaning or maintenance to operate at peak performance
- Better for sensitive skin – Laundry Pro also helps eliminate the itching and redness caused by allergies due to detergents embedded in clothing
- Whiter whites, brighter colors – Laundry Pro keeps clothes looking their best with the cleansing power of oxygen
- Earth-friendly – Cold water only and no detergent bottles to throw away make Laundry Pro a better choice for cleaning clothes while protecting the planet
- Easy to install – Laundry Pro connects to your existing washing machine using standard hoses; no modifications or additional plumbing is required
